

Choose an object that is present on the dresser:

- A. mirror
- B. CD
- C. pen
- D. coffee machine

<think> The goal is to find an object on the dresser. The dresser is located to the right of the current position, so I need to move towards it. The rotation value of 64 indicates a right turn, and the forward distance of 125 moves me closer to the dresser. The final look value of -38 suggests a slight left turn to align with the dresser. <think>
