

Choose an object that is present on the bed:

- A. bottle
- B. teddy bear
- C. pen
- D. towel

<think> The task is to find an object on the bed. To do this, I need to exit the room by opening the door and then proceed to the bedroom. The door is slightly ajar, so I can see part of the adjacent room. The bedroom is located to the right of the current room, which means I should turn right. After exiting the room, I will be able to see the bed and search for the object there. <think>
