Choose a desk lamp's state on the dining table.
A: turned off. B: turned on.

<think> I need to move towards the table on the left. By rotating -47 degrees, I can face the direction of the table. Then, by moving forward 145 units, I will get closer to the table. Finally, by adjusting my view with 33 degrees, I will have a clear view of the table. <think>
<head>-47</head> <fwd>145</fwd> <view>33</view>
